An Overview

- The PulsePoint mobile app alerts CPR-trained bystanders to someone nearby having a sudden cardiac arrest that may require CPR.
- The app is activated by the local public safety communications center simultaneous with the dispatch of local fire and EMS resources.
- The app is only activated if the event is occurring in a public place (the app is not activated for residential addresses).
- In addition to the life-saving CPR/AED functionality, the app provides a virtual window into fire and EMS activity in the community, offering a unique opportunity for civic engagement and transparency.
- The purpose of the app is to increase the survival rates of cardiac arrest victims.
- Funding and support for the application is provided by the PulsePoint Foundation, a nonprofit organization established to guide, enhance and expand the reach of the app.
